

MARQUIS de POMBAL CHARITY TAX ISSUE. 1925

ISSUE

This issue was released to raise funds for the erection of a monument to the Marquis of Pombal, the rebuildler of Lisbon after the earthquake of 1755. Recess printing by Waterloo and Son, London. The stamp was to be added to normal postage on certain days or double the value of the postage would be added as postage due. There were many remainders and so in the 30s these stamps were used to service normal postage and can therefore found in this form.

DAYS OF USAGE

These charity tax stamps were used from the 8th to 13th of May 1925, and the 5th to 15th of May in 1926, and 1929. Postage Due stamps were sometimes used on these days.

ANGOLA CHARITY TAX STAMPS. (Assistencia)

ISSUE

For compulsory use on internal letters on certain days of the year as an additional postal tax for public charities. All were printed locally in Angola at the Litho Impresa National de Luanda. The most notable feature of the printing is the various shades produced, particularly with the lime green issues. The surcharged issues are found doubled, inverted or displaced. The "Portraits" are printed in two runs of the press and so are found displaced, inverted or doubled. The 1965/72 "INA" is found with a disappearing "INA".

ANGOLA CHARITY TAX. (Povoamento)

ISSUE

These stamps were authorized by decree law No. 3230 on March 21, 1962, to provide funds for the "Junta Provincial do Povoamento" - The Provincial Settlement Committee" to support immigration to Angola. Their usage was required all year round after July 1962 and therefore are found commonly on mail and also with assistancia stamps which were only required for certain periods during the year (In particular, New Year and Easter). The original values were 50c, E, 2, 5, 50 and 100. Additional values were created to cover intermediate amounts necessary for documents 10, 20, 30 and 40. Printing was done in Luanda by Empresa Grafica. Postal values were 50c and 1 E. Telegrams and money orders were 2 E. The 1965 issue was designed by V. Santos and printed by the Instituto Nacional de Assistencia. The 1972 issue was printed by the Impresa Nacional de Angola.

ERRORS

As these issues were printed in two or three colour runs of the press, all issues are found with printing faults - displaced, inverted, doubled, missing colours, reversed and imperforate or mis-perforated. Such errors are classified as printer's waste.
